Get more mileage out of your calibrator

Introducing the new easily transportable Fluke 5522A Multi-Product Calibrator with tough protection inside and out.

Whether you calibrate in the lab or on the road, the Fluke 5522A Multi-Product Calibrator handles more workload with less work. Its superior accuracy and easy transportability boost efficiency. And its rugged design gives you more protection inside and out with:

- Robust reverse power protection and quick disconnect circuits that prevent costly damage from operator connection errors either in or out of the lab
- Ergonomic carrying handles that make it easy to move short distances
- An optional rugged carrying case with built-in handles and wheels for easy transport and removable front and rear access doors so you can quickly get to work without unpacking the calibrator.

To find out how the tough new Fluke 5522A will help you cover more workload at a remarkably affordable price, visit **www.flukecal.com/5522A**
