

Fluke Process Instruments

insightTM Software for Reflow Tracker[®]

SOFTWARE SO SIMPLE, IT DOES THE ANALYSIS FOR YOU!

Datapaq[®] once again sets a new standard for profiling software. Wizards that guide you step-by-step through the profiling process, built-in alarms that alert you when your process is out of tolerance and an incredibly easy methodology to precisely analyze the profile.

InsightTM software is compatible with all existing Datapaq software and hardware, (including Surveyor files), providing users with a seamless transition to the latest profiling technology.

InsightTM Wizards

Even when performing the most complex analysis or set-up, Wizards ensure the user is led step-by-step through the profiling process. This not only guarantees that all the steps are completed, but also reduces training time.

Reflow Results Summary

You define your profile zones and Insight software calculates the critical parameters in each of the zones. The results are then displayed in one table – making analysis fast and easy.

Alarms

Use the alarm feature to alert you when there is a fault with the process. Set up alarms for any of your numerical analysis fields. It's incredibly easy to do. If any of the values exceed the limits then an alarm shows on the screen, eliminating any possible operator error.

View Multiple Profiles

Open more than one file simultaneously and a new tab will appear – allowing you to switch rapidly from one file to another.

Minimum computer specifications

- Windows XP, Vista (32 and 64-bit), Windows 7 (32 and 64-bit)
- 512MB RAM (1GB RAM for 32-bit Vista and Windows 7, 2GB RAM for 64-bit Vista and Windows 7)
- 1 GHz Processor
- 1024 x 768 screen resolution
- USB port and DVD drive
