# Food Tracker®

## Food Tray and Jig

### FOOD TRAY

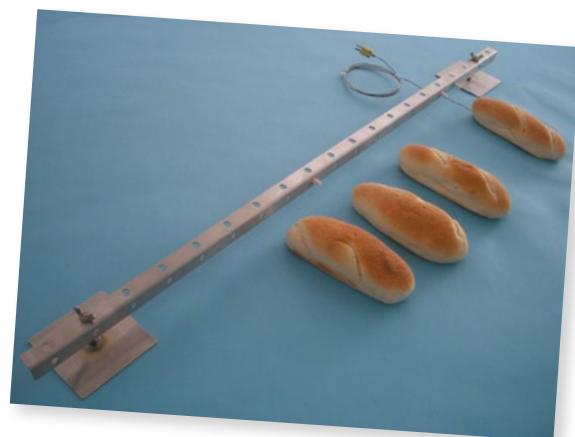

The Datapaq® Food Tracker® Food Tray and Jig is designed for use in conveyORIZED processes to ensure repeatability/accuracy of process monitoring without disturbing production or interrupting the conveyor line. Probes can be positioned uniformly across the product or the mesh belt to quickly and efficiently identify hot and cold spots. The probe is guaranteed to remain secure in the product and any risk of the probe snagging is removed.

The Food Tray and Jig are ideal for small, low height products (chicken nuggets, filets, beef patties, etc.), especially where frequent profiles are required.

<b>CS3043A</b>	For use with TB5815A Barrier
<b>CS3044A</b>	For use with TB5816A / TB5009A / TB5011 Barrier
<b>Tray Weight</b>	1.45 kg (3.2 lbs)
<b>Width</b>	600 mm (24 in)
<b>Depth</b>	407 mm (16 in)
<b>Height</b>	Minimum 51 mm (2 in), or barrier height, if greater

# TECHNICAL SPECIFICATIONS

## THERMOCOUPLE JIG

### CS3045

Designed to allow thermocouple positioning across wide conveyor belts used in bake type processes.

The jig makes both oven balancing and product monitoring easy and repeatable.

The width of the arm can be easily adjusted, as well as the exact location (width and height of the probes).

<b>Width</b>	<b>(maximum)</b>	2300 mm (7.5 ft) 3 bolted sections mounted on 3 supporting feet
	<b>(minimum)</b>	1000 mm (3.3 ft) 1 section supported 2 supporting feet
<b>Weight</b>		1.6 kg (3.52 lbs) maximum
<b>Height</b>		Standard minimum oven clearance 50 mm (2 in)
		Lower heights possible on request.
<b>Standard Maximum Operating Temperature</b>		265°C (509°F)
